

SECURE AI. CYBER RESILIENCE. MISSION EXECUTION.

Veteran-led technology and mission services for government and business - engineered for accountable delivery, evidence-backed decisions, and secure modernization.

01 CYBER & RISK

RMF / A&A, NIST control mapping, security assessments, risk analysis, policy, POA&M and remediation planning.

02 AI, DATA & AUTOMATION

AI readiness, governed use-case evaluation, data governance, analytics, decision support and human-reviewed workflow automation.

03 ENTERPRISE & MISSION

Architecture and modernization planning, cloud readiness, systems integration, program controls, technical documentation and logistics analysis.

CORE COMPETENCIES

- Cybersecurity program support, RMF/A&A/ATO evidence, NIST-aligned assessments, control and risk documentation
- AI governance, use-case readiness, data quality/governance, analytics, reporting and workflow automation
- Enterprise architecture, requirements analysis, cloud and modernization roadmaps, integration and acceptance planning
- Program delivery, schedules, risk registers, SOPs, process improvement, sustainment and supply-chain analysis

WHY MSG

- Executive accountability from pursuit through acceptance
- Credentialed cyber and program leadership
- Secure-by-design, evidence-first delivery discipline
- Lean decision paths and responsive execution
- Federal, state, local and commercial readiness

Veteran-led small business

BUYER-READY ENGAGEMENTS

SECURITY ASSESSMENT

Defined-scope cyber and compliance reviews with evidence maps, prioritized findings and remediation roadmap.

RMF / A&A SUPPORT

Control mapping, artifact strategy, SSP/POA&M support, evidence quality review and authorization-readiness coordination.

AI READINESS & GOVERNANCE

Use-case portfolio, data and risk review, governance controls, pilot plan and measurable decision criteria.

DATA & AUTOMATION

Governed analytics, reporting, workflow automation and decision-support design with human review built in.

MODERNIZATION ROADMAP

Current-state analysis, target architecture, requirements, transition plan, test/acceptance and risk controls.

PROGRAM & OPERATIONS

Schedules, risk and issue controls, SOPs, process improvement, technical documentation and logistics analysis.

Experience attribution: Leadership credentials and prior mission experience belong to the named individuals and are not presented as MSG corporate past performance. Engagement commitments are made only where MSG controls the required qualifications, personnel, pricing, and delivery capacity.
